Clean Storm GTIN 717510409055 Faucet Key Four (4) Way J40-005 and AX51

Manufacturer: Clean Storm

Clean Storm 717510409055 Faucet Key Four (4) Way

#### Description

For opening and closing sill-cocks or spigots. For sill-cocks with 1/4", 9/32", 5/16", or 11/32" stems. Used on many commercial properties to open and access water spigots / garden hose access doors. For example the next time you go to Walgreen's there is one of these water doors just to the right or left side of the entrance. The key opens the door and is used to control the water flow. Any pro who does commercial work should have a 4-way faucet key in the van. It gives you instant access to the building's fresh water supply even when there's no handle on the faucet. When you need it, this little gadget is worth its weight in gold. Fits 6, 7, 8, and 9 mm stems.

Also marketed under part number(s):

AX51

J40-005
