

Model Number: 20240102

Convert Portable to a Truckmounted Carpet Cleaning Machine and Leave outside with Generator Reel Power Cord 20240102

Manufacturer: Clean Storm

Turn your portable into a truckmounted carpet cleaning machine and leave it outside. Package is designed to use with auto fill and auto dump machines that have at least 6 stages of vacuum (use vacuum booster in home) or 8 or more stages of vacuum so you can leave in your truck or trailer while cleaning. This package is half price shipping from purchasing seperatly. The main idea here is that you always use your customer power supply first from their own 220 volt electric close dryer plug first, then regular outlets, and as a last resort your electric start generator. Please note anytime you are using a 220 volt converter your are required to test the voltage before use. "Just because it plugs in does not mean it is OK to use!" Purchase a tester for few dollars more here.
Examples of the type of equipment that would work with Goliath Extractor, Mytee M5 with Vacuum Booster.

Package includes:
50 ft 220 volt 10-3 Extension power cord
