

Model Number: 862041-

Nikro 66ft Solid Core Rotary Brush System w/Button Lock Brushes [862041-]

Manufacturer: Nikro

66' Solid Core Rotary Brush System w/Button Lock Brushes

Product Description
New snap on design - No need for tools
Can be run in forward or reverse without the possibility of spinning off a brush

Button locking stainless steel design for durability and lasting performance

Solid Core design for rigidity prevents the cable from curling back toward the operator and allows for greater control of the brush head. These systems have a replacement inner rotary core that can be replaced/repaired in the field, providing longer life of the system and preventing down time. Powered by your drill with clutch or one of our clutch driven drills or drive unit.

Please only use unit with no more than 360 degrees of turns.
Do not turn/use cable with the hose coiled up.
Must use a clutched drill or drive box.
If you use a standard drill and/or break the cable it will not be warrantied.
The only way you can break the cable is to use this with a non clutched drill and/or leave coiled up.
Please note end is a square drive and will not turn in a standard 1/2" clutch drill without a little wobble.
Designed to be used with the optional Cobra 5 power box below but is possible to use a clutched drill.

The only way to brake this cable if by operator error.
