Hydroforce AH111 Hoser Vacuum Hose Washing Tool washer 1623-2314 TMT-AH1000

Manufacturer: HydroForce

Keep Your Van and Customer's House Clean

Hook up to a solution and vacuum hose and you're ready to clean your vacuum hose. Pull the end of the vacuum hose through the Hoser and attach to your reel. Hold the Hoser in one hand and move the reel with the other hand. The reel will pull your vacuum hose through the hoser. Adjust the speed of your reel to move dirtier portions of hose through the Hoser at a slower rate.

This tool protects your image and will make it easier to clean your hoses than previous methods. The Hoser is invaluable to companies who deal with water damage. It will thoroughly clean your hoses after a category 2 or 3 flood so you don't have to worry about nasty smells or stains later on. The hoser will work on 1 1/2" and 2" vacuum hoses.
