Clean Storm EULVCFVT Electric ULV Disinfectant Cold Fogger For AirDucts Deodorizing and Misting 20200615

Manufacturer: Clean Storm

## Electric ULV Cold Fogger

This unique ulv fogger comes not only with features you'd expect from a quality fogging apparatus, but several other intelligent features designed to accommodate a busy technician.

The Fogger's Head at the end of the hose comes complete with its own clasp that allows the head/hose assembly (12 inch long hose from the body to the head) to either be secured at the front or rear of the tank. The translucent holding tank is graduated to allow easier chemical mixing, making chemical ratios easier to calculate!

The front mounted power switch allows a technician convenient on/off access, and to top it all off this unit ships with its own carrying strap, allowing this fogger to be shoulder carried! Having two free hands can be invaluable whilst taking care balancing high up on a ladder.

This fogger has a faster spray than your average "ULV" fogger, penetrating deeper into ductwork, using more solution to help you get through quicker! Great for pest control, bed bug removal, deodorization work, dog grooming, and more...
