TYVEK COVERALLS With HOOD & BOOT (XXL)

25 Per Case

From lead and asbestos abatement to spray painting to dirty jobs, Tyvek® garments have long been the first choice in protective apparel.

Tyvek® garments are composed of flash spun high density polyethylene which creates a unique, nonwoven material available only from DuPont.

Tyvek® provides the best balance of protection, durability and comfort of any limited use fabric technology. Tyvek® fabric offers an inherent barrier to particles down to 1 micron in size.

Protection is built into the fabric itself; there are no films or laminates to abrade or wear away. Tyvek® fabric's durability advantage over microporous film and SMS fabrics delivers consistently better barrier, even after wear and abrasion.

Applications include: lead and asbestos abatement/ remediation, general maintenance/operations, spray painting, general clean-up.
