FOUR MACHINES IN ONE.

It is a flood pumper and extractor.

It is a vacuum booster for your truckmount or portable.

It is an air duct cleaning machine with the optional dustdowner and air duct attachments.

It is a vacuum recover machine for your pressure washer or tile cleaning equipment.

Those of you at Connections West (and your customers who were there) saw this exciting, innovative product - the Dri-Eaz HVE 3000. It will lead the industry as a robust and durable flood pumper. You can pair it with the Rover HVE or with a wand or manual extraction tool for use in large or multi-level units like apartments, hotels, schools, hospitals, factories, offices, and large residential homes. And, here's the really cool part - the HVE 3000 can double as an inline pumpout to boost truckmount vacuum performance by up to 40% on long hose runs!

HVE 3000 Portable Flood Pumper and Inline Truckmount Booster

Robust, durable and powerful, the HVE 3000 flood pumper lets you remove water from flooded structures quickly and effectively. The unit can also be used as an inline

>

pumpout to boost truckmount performance for long hose runs.
Pair the HVE 3000 with the Rover HVE, a wand, or other manual extraction tool and used to remove excess water in large or multi-level units like apartments, hotels, schools, hospitals, factories, offices, and large residential homes.

High vacuum performance. Dual vacuum blowers and 2 in. inlets and outlets for maximum airflow.

High maneuverability. Unique vacuum hose and housing design makes moving the unit easy – just pull on the hose! Slim profile to fit through the narrowest doors – only 22.5 in. wide.

High capacity waste tank. 12 gallon tank for fewer trips to the drain!

Auto pumpout or quick gravity drain. Standard garden hose connection for auto-pumpout, or use the large gravity drain at toilet height.

Product Features

Easiest cleanout filter. Just pop the clamps on the clear plastic cover and lift out the basket for rinsing.

A high flow, high volume clog-resistant sump pump – handles up to $\frac{1}{2}$ in. solids.

Rugged construction. Rotomolded housing resists dings and scratches. Low center of gravity provides balanced transport; easy on stairs!

Bypass the waste tank for black water flood extraction to keep the truckmount or main extractor tank clean.

Run one or both vacuum motor because one vacuum motor has a check valve on it to prevent air sucking back through the waste tank.

HVE3000: Powerful portable flood pumper and truckmount booster

The HVE 3000 does double duty as a stand-alone portable flood extractor AND as an inline truckmount booster for carpet cleaning. For flood extraction pair it with the Rover or a wand or manual extraction tool to make quick work of multi-level apartments, hotels, schools, hospitals, offices and large residential homes. Add a pressure washer and turn it into a tile cleaning monster.

High maneuverability. Unique vacuum hose and housing design makes moving the unit easy – just pull on the hose. Slim profile to fit through the narrowest doors – only 22.5 in. wide.

Easiest cleanout filter. Just pop the clamps on the clear plastic cover and lift out the basket for rinsing.

SPECIFICATIONS

Water lift | 160 in lift. | 100 CFM (dual 2 stage series mount)

Discharge pump rating: 50 gpm @ 5 ft. of head.

Tank capacity: 12 gal. | 45 l

Power: 12A (Blower 1 +Pumpout); 13.5A (+Blower 2)

Sump pump power: 1/3 HP

Weight: 127 lbs. | 57.6 kg

Dri-Eaz Extraction Tool F511

Drieaz F511: Flood Extraction Wand 14" Tool F511

Easy operation and fast extraction

The Extraction Tool makes fast work of any flood extraction job. Its patent-pending glide creates a powerful seal to maximize carpet compression while still allowing enough airflow to ensure thorough water removal from all carpet types. A convenient vacuum break lever allows for smooth operation, no matter the carpet type. Plus, the tool is comfortable to operate and easy to clean out and comfortable to operate even on the largest projects.

Product Features

Ergonomic rotomolded handle for all-day comfort — use right- or left-handed.

Save your back! Instant vacuum release lever means there's no need to tilt or reposition tool.

Easy-clean rotomolded head with replaceable glide.

View window in head shows extraction progress; may be removed for cleaning.

Rugged stainless steel 2" tube. (can be used with 1-1/2" ID hose as well with the use of the AH46 expanded hose cuff)

>

Tackle the largest flood jobs fast with the NEW Extraction Tool
The Dri-Eaz Flood Extraction Tool (F511) makes quick work of any flood extraction job. A patent-pending glide creates a powerful seal, maximizing carpet compression ‐ even from deep in the pad!
Many extraction tools require awkward positioning or even counting to ensure thorough extraction. Some also "grab" the carpet. But the Dri-Eaz Extraction Tool is ergonomically designed plus it's equipped with a vacuum break lever. A quick flick of the lever is all it takes to release the tool and resume extraction. This means smooth extraction.

No other manual tool provides more complete water removal! Works on all carpet types, too!
FEATURES

Don't wrestle it; release it! Vacuum release lever means instant release if the tool "grabs."
Best of all - it extracts significantly better than other manual tools!
