Manufacturer: Chemspec

Chemspec C-ELTLC4G Express Lane TLC 2.0 4/1 gallon Case

Heavy-duty Traffic Lane Cleaner For Use On Stain-resistant Carpets As Well As High Traffic Areas Innovation... Even After 30 Years!

As new technology is developed, we continue the Chemspec tradition to bring you the best heavy soil loosening and labor saving prespray available.

Dual Surfactant and No Residue Our new TLC is specially formulated with a dual surfactant/solvent system that is more effective in penetrating and releasing embedded soils. It is effective at 32:1 on greasy/oily soil, asphalt walk-off and other water and oil-based soils. As with every Chemspec product, Express Lane rinses off completely, leaving no residue.

NEW! Chemspec Express Lane 2.0 TLC

Buy more \$ave More!

Chemspec is introducing brand new technology not previously available in the professional cleaning market. This innovative new traffic lane cleaner contains no butyls, no glycol ethers and no phosphates, yet it's a powerful cleaner for removing stubborn soils!

What's truly revolutionary about Express Lane 2.0 is its capability to remove soils safely from all of today's carpet fibers - including the latest fifth-generation polyester carpets. With a neutral pH of 7.3, this new product will become your customers' go-to everyday traffic lane cleaner.

Chemspec wants to help your customers be proactive about reducing the VOCs in the products they use. At least 16 states have already implemented VOC compliant regulations - while not yet heavily enforced, they are likely to be in the near future. Most of today's most popular presprays contain butyls and glycol ethers as well as phosphates. These popular cleaning boosters, which have been the mainstay for most cleaners, are definitely on the list of solvents and boosters that will soon come under fire from regulatory groups.

Chemspec wants to offer you solutions to these issues, starting now with Express Lane 2.0, a next-generation prespray that is available for sale in all 50 states, including California, where the most stringent VOC and CARB compliance regulations are strictly enforced.

This unique new formulation was developed in Legend Brands' new R&D Lab and it is exclusive to Chemspec!

NELTLC2.04G - Case of four 1 gal. / 3.8 L bottles

36 cases to a pallet

C-ELTLC4G

Solves Wick-Back and Yellowing. For wick back problems or yellowing due to problems associated with glue back carpets, saturate with a 10:1 dilution. Allow 5 - 10
