Ace TurboDryer®;
Excellence in Design Award Winner

All-around efficiency for any job.

Looking for an airmover that offers the most CFM per circuit of any airmover on the market? Look no further, it's called the Ace!

7-Position Versatility

Unique 7-position versatility of the Ace means you can use it on a wider variety of work than ever before. Use the Ace on drywall, hardwood floors, sub-floors, baseboards, ceilings, or any type of building material to dry without cutting, removing or replacing.

Ventilate Crawlspaces

Easily ventilate crawlspace with the Ace. It can be used to pull air out of crawlspaces and establish a negative pressure. The negative pressure will draw clean, heated air from other parts of the structure into the crawlspace for drying while preventing contaminants from being forced into other clean areas of the structure.

ACE TURBODRYER BENEFITS

>

Incredibly low amp draw
Seven position versatility for handling a wide range of applications
Dry structures fast with 2000 Actual CFM
Turn or tilt on non-skid rubber feet to switch operating positions
Compact design that's stackable for operation and storage
Ideal for structural drying, carpet cleaning, ventilation and more!
Also Marketed under model number 5UNZ3 and DP-AAM-EA
Microban impregnated plastic housing

Microban is a registered trademark of Microban Products Company.
