What the Power and Prestige of a Prodigy HSR Can Do For You!!!

It's Remarkable That...

*The US Navy bought Prodigy's to clean the bilges on their ships and decontaminate Troops

>

*Many large cleaning companies in Japan have purchase Prodigy's for its superior Design, strength, quietness, reliability, and does not waste space.

*Distributors around the USA are amazed at the training and support they receive from PowerPlus, not to mention the Price and Profits of an HSR.

*The City of Compton CA watched as the Prodigy HSR cleaned the bricked street outside City Hall, removing gum, oils, and other buildup, cleaning the deep large 2 in. gaps in the brick.

*The owner of a machine shop floor whose floor was layered with years of Tar like build-up finally saw down to the real floor with a single swipe of the Prodigy HSR wand during a demo (of course, hiring the cleaner to finish the job)

*Cleaners discover they can own a Prodigy HSR for less than the leading competitor's truck mounts, all of whom have lost head-to-head in competitions against PowerPlus Truck Mounts!

*Carpet Techs easily operate the Prodigy HSR within moments of introducing it to them. It's almost too user-friendly

*Several high-End Stone Care Cleaners remove the Prodigy name from their machines to keep their big blue money-maker a secret from their competitors.
