Model Number: F354

Drieaz F354 Rover HVE High Volume Extractor Wand 112125 42474 A42474

Manufacturer: Drieaz

Drieaz 112125 Rover HVE High Volume Extractor Wand F354

The Rover HVE will change the way you think about extraction. Unsurpassed maneuverability and loads of special features make extraction more efficient than ever. The Rover's joystick precisely controls separate drive wheels to allow easy maneuvering around the sharpest corners. Its patent-pending stainless head with custom polymer glide has a self-healing edge that easily rides over the carpet to maximize extraction on ALL types of carpet.

Product Features

- Separate drive wheels allow the Rover HVE to move easily around corners and in tight spots
- Replaceable polymer glide seals firmly over all carpets to provide deep extraction
- Joystick is rated for 5 million cycles
- Collapsible handle for space-saving storage and ease of transport
- Front loading wheels make the unit easy to transport and store
- Extraction can be visually monitored through the clear take-up tube

Turns your carpet cleaning machine into a water damage flood sucking system able to remove water from both the carpet and carpet cushion at the same time!.

Model
F354

Weight
67 lbs

>

Extraction path width
19.75" (50.2 cm)

Dimensions
45.7"H x 22"W x 27.6"D
(116 x 56 x 70 cm)

Folded Dimensions
(for storage or transport)
40.5"H x 22"W x 10.7"D
(103 x 56 x 27 cm)

Amp Draw
3 amps

Speed
2 Speed switch

Power
110 W (0.148 HP each motor)

Voltage
115 Volts

Cord Length
45 ft.

GreenGlide
Interchangeable Polymer Glide

Handle
Collapsible

Housing
Rotomolded Shell

Frame
Stainless Steel Structure

>

Joystick Control
Joystick (rated for 10 million cycles) controls Dual Drive Motors

Customer Testimonial

I first experienced the Rover HVE in the new Dri-Eaz Restorative Drying 201 course and called a distributor to purchase one before the class was even over. It's been a good decision because the Rover has been out on jobs every day since we purchased it! Our crews request the Rover over other options. Techs say it's just plain easier and faster to use. The Rover's lighter weight makes it easy to load and unload. The power cord and vacuum hose are easier to manage, and when strapped together, they stay behind the operator and don't get in the way. Another plus is the view tube, not only for the operator, but so the client can also see how much water we extract. The joystick makes the Rover more comfortable to operate than other extractors and the Rover does a better job of extraction overall. To make a long story short, we are very pleased with the Rover and plan to purchase another unit soon.

Thanks Dri-Eaz for your ingenuity-keep up the good work so we can too.

—C. Randy Moberg, FireDEX of Butler
