Model Number: F309

Drieaz F309 GE Protimeter Hammer Electrode

Manufacturer: Drieaz

>

Item #F309

Dri-Eaz presents the
GE Protimeter Hammer Electrode

Precise moisture readings at depth

The Hammer Electrode penetrates through structural materials like sub floors and framing to a depth of 1.38" (35 mm). The insulated pins determine the exact moisture content of wood or the Wood Moisture Equivalent (WME) percentage of other materials. Use it to evaluate the extent of water damage during an inspection and while monitoring the drying process.
