Model Number: #8085

Harvard Chemical Enzyme Prespray 8 Jar HCR 8085

Manufacturer: Harvard Chemical Research

Picture is not identical to actual product, just an example.

Description:

This Highly effective product has been formulated to deliver the maximum cleanliness of severely soiled carpets and fabrics. Enzyme prespray is a powerful cleaning partner when used with other detergents that can not remove soils and stains on their own. This product works by breaking down the protein bond that causes soils and stains to adhere to carpet fibers. After bonds have been broken, soils and stains are removed effortlessly and quickly. Grease and oil based stains are no match for this quality product; Enzyme Prespray works immediately to digest grease and oil-binding soils. Enzyme Prespray is quick dissolving, phbuffered, and simple to use.

Exonomically, enzyme Prespray is competitively priced in comparison to other products on the market today that have been developed as enzyme soil lifters. Several cleaning steps & labors costs are eliminated because Enzyme Prespray can be used on its own or along with detergents to quickly and easily digest the basic chain of construction in fats, oils, greases, proteins, etc.

Specifications:

Appearance: white Powder.

Odor: Slight Citrus

pH(1% Solution) : 11-12
