Karcher Cyclone Surface Cleaner 8.903-608.0 (89036080) Black Base Legacy Shark 30-587
Freight Included

Manufacturer: Karcher Pressure Washing

Karcher: Cyclone Surface Cleaner, W/Blk Base - 8.903-608.0 - Legacy Shark
Cleaning large driveways or warehouse floors is tough when using only a pressure washer. Typically, a quick connect nozzle produces "zebra-striping" which certainly doesn't make the surface look clean. But, using a flat surface cleaner changes all of that! Similar to walking behind a lawn mower, these rotary surface cleaners literally "mow" dirt off the surface in no time! Simply connect the high pressure hose from your pressure washer to the trigger on these flat surface cleaners, and watch the dirt melt away. High pressure nozzles below the housing spray at a high RPM, and clean a large path, eliminating the zebra-striping effect. Several sizes and designs to choose from - can be used with hot or cold water pressure washers.

- The Hotsy Cyclone Flat Surface Cleaner can be used with pressure washers up to 5 GPM, between 2000 - 3500 PSI and at temperatures up to 200 Deg F. Manufactured with a polyethylene housing, pneumatic tires and a collapsible handle, with a 20 inch diameter cleaning path. Great ergonomic design.

Compare to current or past OEM associations:
