Model Number: 80005

Pumpteck 80005 Pump Motor Set 112V Head w/ M70 Motor 200Psi 120V 085 Bearing 80134 GTIN 10679065070685

Manufacturer: Pumpteck

Pumpteck 80005 Pump Motor Set 112V Head w/ M70 Motor 200psi 120 Volt 085 Bearing

Description

A simple plunger pump originally designed for cleaning in the floor care industry but now used in many other industries due to its versatility. Designed to fit our 1/8hp permanent magnet DC motors in a variety of voltages. Can be configured with multiple elastomer choices to meet your fluid compatibility needs and can be optimized to your application flow rates. This pump is proudly made in the USA from aircraft-grade aluminum and stainless steel.

Efficiency

The plunger type design of the 112 is the most efficient way possible to pressurize water. PUMPTeck efficiency produces up to 20% more pressure or flow for a given power input compared to some competitors' pumps.

Maintenance & Simplicity

Factory lubricated for maintenance free performance. The only tool needed to completely disassemble the pump to its basic components is a simple hex wrench.

Durability

Durability results from exclusive use of premium materials. All metallic wetted parts (except body) are stainless steel or chemically resistant plastic.

Versatility

Flow and pressure can be optimized to exactly match power input to nozzle size by customer selection of the precise eccentric offset.

Features

- Hardcoat aluminum pump body and stainless steel plungers for long life and compatibility with many liquids
- 1/4 npt inlet and outlet ports for connecting fluid supply line, output line, and pressure regulator
- Continuous duty motors
