ZipWall Spring Loaded Poles 6 Pack

Manufacturer: ZipWall Barrier Products

The SLP 6 Pack Includes:

- 6 spring loaded poles
- 6 grip disks
- 6 tethers

The SLP6 comes with six of our Spring Loaded Poles and is great when you need a bunch of poles for a big job. It's also an economical way to add SLP&trade; poles to your ZipWall&reg; system.

The SLP&trade; pole has the spring loaded plunger built right into the pole. The plunger is made of polycarbonate and is incredibly strong yet the SLP&trade; pole weighs in at just over a pound and a half. This makes them hard working on the job yet easy to handle and transport. The poles extend from 4' 9" to 12', just right to reach any standard ceiling. This product has received raves from This Old House magazine, Remodeling magazine, and many others. The readers of Building Products magazine gave the ZipWall&reg; system the Readers' Choice Award for 2006. For more information about these award winning products, check out the short video demos listed on this page.

The six SLP&trade; poles extend from 4' 9" to 12 feet.

The poles can be placed 8 to 10 feet apart. If there is any significant air movement that pushes the plastic you will want to pull them in closer together.

The GripDisk&trade; slide stoppers should always be used especially on hard surfaces. Six GripDisk&trade; slide stoppers come in every SLP6 package.

Plastic sheeting is not included.

*Availability: This product was added to our catalog on Monday 28 December, 2009*
