Shazaam 20170117 Pet Odor Control Start Up Bundle

Manufacturer: Shazaam

Shazaam 20170117 Pet Odor Control Start Up Package
Description
Pet odors can be a problem, so Steambrite has created an Pet Odor Control start up kit. This package will knock out and clear up pet stains and pet order with dual action chemicals.
Instructions
Pet urine never dries. To locate pet odor, use a UV light and a hydrosensor. Pet urine will light up when UV light is passed over it as well will provide a moisture reading with a hydrosensor.

Once you locate the source of the urine, you can use either one of three options to remove the contamination using Pet ordor Control start up Package.
Option 1
Sub surface treatment. Use Pounce and Flush Out. Take a 5 gallon pail and fill halfway with super hot water. Add a cup of Pounce and a cup of Flush Out and with a paint stick stir. You will take this hot mixed product and pour onto each urine contaminated area in the carpet. Allow 30 minutes dwell time and extract with sub service extraction wand. Clean the carpet as normal and post dry with air movers.
Option 2
Topical treatment. Prespray ready to use Flush out aggressively on each urine stain. To use Flush out, remove the yellow metering tip on your injection sprayer so it will spray 1 to 4. Place the Flush Out in a dedicated injection sprayer jug. Heavily spray urine soaked area so as to puddle up the Flush Out on the carpet. Apply any traffic lane prespray (Such as Kryptonite) around the urine soak area and not on top of the Flush Out. Scrub or rake/groom carpet as need to get the carpet clean. Allow at least a 15 min dwell time. Agitate carpet presprays as needed. Rinse carpet with you normal formulated carpet rinse extraction cleaner (like Flush Pro) as part of the cleaning process. Post apply the Odorcide from you injection sprayer from a dedicated injection sprayer jug. Aggressively post apply ready to use Odorcide directly on top of urine stain locations. Do not rinse out, just post vacuum excess moisture from carpet using suction only.
Option 3
Enzyme topical treatment. Prespay urine spots with Harvard Stain OFF. Allow to dwell between 1 hour to 2 weeks. Then follow steps in Option 2 to finish. Harvard Stain Off is a great option for customer that want to self treat the carpet urine stains themselves. All Enzyme urine treatments cause resoling so they have to be cleaned out or the carpet will get dirtier sooner than non treated areas and so requires some type of follow up carpet cleaning.
The Odor Kit consist of:

Steambrite Supply
