Groom Industries Refresh Soft Concentrated Neutralizing Rinse Aid - 1 Gallon

Manufacturer: HydroForce

Refreshsoft Neutralizing Rinse is a concentrated neutralizing agent used in the final extraction and rinse of the extraction cleaning process for carpet and upholstery. It completes the ideal extraction cleaning with its non-resoiling formula that includes an encapsulant polymer.

Laboratory tests demonstrate that Refreshsoft rinses out soil and residue, and protects against resoiling better than water alone. It stabilizes dyes, works to prevent browning and yellowing, pH neutralizes the carpet, and leaves a soft luxurious feel. As a neutralizing extraction rinse, Refreshsoft contains special added cleaning ingredients that makes it more effective at soil removal than conventional neutralizing rinses. It is safe and effective for all synthetic fibers, including warranted stain resistant carpets, as well as all water safe natural fibers. It also contains corrosion inhibitors to protect your extraction equipment.

Refreshsoft works effectively with any type of extraction equipment & truck mounted, portable, or walk behind. It is especially formulated for high heat producing truck mounts that produce over 200 -220°F. You will experience superior cleaning results and will prevent re-soiling.

Dilution Ratios: 2 oz./ 5 gals. RTU pH: 3-3.5 Contains: 1 gallon
