ROI Can rent for \$114 a day.

High Performance

Super maneuverability

The well designed Compressor and coil capacity boost a unit's water removal rate

Large Wheels for maximum mobility,even on stairs.

>

Hot Gas Defrost system is microprocessor controlled, allowing effective operation down to 33°F (-1°C)

Ergonomically designed handle at the top for easy move around.

An automatic pump saves dumping bucks.

Handgrip at the bottom for easy loaded and removed from a van.

User Friendly

Robust Construction

Well designed graphical user interface implemented into the touch pad control panel for easy operation.

Rotomolded housing for long lasting and low maintenance.

Sliding air intake cover makes life easy for daily air filter maintenance.

Large non marking wheels

Cable and Water Pipe Rewinding System keep cable and water pipe neat and tidy when storage.

Built in Air Outlet Ring for easy connecting the ducting

Environmental Friendly

Low Maintenance

The filter size is 12.4" (315mm) X 10.8" (275mm) X 3/8" thick

>

Careful compressor starting extends its life.

The diameter of the dry out air is 5.7" (145mm) for 6" Ducting.

HAF Filter decreases the maintenance and improves indoor air quantity.

In a side by side comparison with the R175 dehumidifier, the DriStorm won in water removal, but the same relative humidity out bound air.

In as side by side comparison with the Drieaz Drieaz 1200 the DriStorm 134 dehumidifier won in water removal and in lower relative humidity out bound air.

Rental Requirements:
Texas Drivers Licences Number and Date of Birth
Current Living Address
job site address
Social Security Number

>

Licenses Plate information on vehicle used to transport equipment.

Credit card information or cash deposit.

Clean and rinse out the machine, hoses and wand when finished. A \$15 cleaning fee will be collected if the equipment is dirty on the return. If the machine is used for body fluid removal, construction work work a \$15 cleaning and sanitizing fee will be assessed PLUS you are required to clean the machine yourself and purchase a replacement air filter. If you fail to inform us that you used the equipment in this manner you will be open to a law suit for damages by subjecting the public to hazards.

Options:

Water extraction machine for sucking water up off the floor.

Air mover rental

Air scrubber or Hepa filters

Sanitizing, Cleaning and deoderization chemicals.

Water Claw Wand to remove water and odors from under the carpet and padding/cushion.

Wall and floor perforation tool

Moisture meters to confirm the walls are dry before you remove equipment.

Pick up and delivery (in some cases)

Caution: It is important to not overload the electric power circuits in the building that you are placing the equipment. Just because it plugs into an outlet does not mean it is OK to that outlet. It is the responsibility of the user to confirm that the power can support the equipment.

Questions:

A. How come I have to supply my Social Security Number?

Answer: This is to affect your credit when you do not bring the equipment back. This is no different than when you go to the doctor's office and they ask for your social security number. They only reason they need it is if you do not pay your bill promptly. The only reason the doctor's office needs your SS number is to affect your credit. This is a requirement. The only way to avoid providing this information is provide a large enough cash deposit that will purchase the equipment.

B. Are you open on Sunday?

"No." If you rent on Saturday we do let you keep the equipment an extra day for free, if you do not use the equipment, but you will be required to bring the equipment back on Monday morning. If you use the equipment on Sunday you will have to pay for the rental for Sunday. The dehumidifier has an hour meter on it.

C. Can I reserve a machine for a specific day?

"Yes." Only if you prepay for it. We will have to take the required information over the phone and charge you in advance for the rental.

D. What if I prepay for a rental and cannot show up to pick up the machine?

All sales are final. No credit is placed back on your credit card, but we can carry over the funds to use on a different day (like purchasing an air line ticket.)

E. What if the machine does not work? Will you bring me a replacement? Can I get

>

my money back?

You will be required to bring the machine back to us. We will not bring you a replacement. Over 90% of the times a customer states they cannot use the machine, the machine is tested at our location and we cannot find anything wrong with it. Please make sure before you leave our location, you know how to use the machine! When you bring back the machine, it will be tested, if there is nothing wrong you can finish out the days rental. If there is really something wrong with the machine, you can have a substitute machine or have credit to use on a different day. You will not get your money back.

F. Does the machine come with instructions on How to dry building or do odor control work ...?

"No." Please ask your service rep at SteamBrite for help with any specialty issues.

G. How long does it take to dry a building?

Carpet dries in one day, foundation will usually take two days. Walls and cabinets will take a full 3 days. The previous statement is based on the correct air movement and temperature maintained in the building.

H. What will happen if I only rent for one or two days?

You will grow mold and mildew inside your walls. Please confirm the moisture content of the walls is below 10% before you remove the dehumidifier from the building!

I. Will Steam Brite come out and clean or do a job for me?

Yes. You can call our office with your problem and we will see what we can do to help.

J. Can I pick up a machine on Friday and bring it back on Monday?

Yes, but you will be charged for the number of days you use the dehumidifier(s).

K. I only got water on the floor and not the walls, do I need to rent for three full days?

99.99% of the time when I have customers tell me that their walls are not wet, they are wet. The walls are not a little wet but very wet. It is not uncommon if you have a half an inch of water in your building your walls can be wet up to 3 feet high. The water will wick straight up the walls. If the water touched the water on the floor the wall is wet even if you cannot see it or feel it with your hand.

L. What is the recommended temperature to set the AC/ Heating on?

68 degree F with the blower motor to the ON position.
