Manufacturer: KleenRite

Durrmaid 1700 Plus 2.1gal 60psi Heated Auto Detail Extractor from Durramaid Plus 1700

Color Not Guaranteed!

Description

The Durrmaid Plus 1700 Watt Extractor & Wet Dry Vacuum does double duty! It works as a powerful hot water extractor and a wet/dry vacuum. No need for two separate machines! A 60 psi water pump and enhanced suction distinguish the Plus1700 from other portable hot water extractors. For detailers and do-it-yourselfers, the Durrmaid Plus 1700 Extractor and Wet/Dry Vacuum is one versatile, cost-effective carpet cleaning machine.

Benifits

The Durrmaid Mini Hot Water Extractor has a capacity of 2.1 gallons, making it incredibly light and user-friendly. This mini extractor heats the water to 212 degrees, which quickly breaks down greasy soil to release it from your vehicle's carpet and upholstery.

New 17' Super-Flex "crush proof" Vacuum Hose will survive from almost any vehicle running over it while still being extremely light weight and flexible, allowing it to reach easily into difficult spots without the twisting of the larger hoses in the industry. It also features a smooth inside lining to prevent clogging while in use.

The Lexan attachment allows you to see dirt as it is removed from carpet and upholstery.

Its Wet Dry Vacuum fulfills your need for a powerful wet/dry vac and a high performance hot water extractor. If you're in the business of detailing, this saves you an expense because you're only buying one machine to do two jobs. The Super 1700 does both jobs very well. In fact, the Super 1700 has a 23% more powerful vacuum motor! (equates to 120 CFM and 102" of Lift) If you're looking for a hot water extractor and shop vac in one, this is it.

It has a capacity of 2.1 gallons, making it incredibly light and user-friendly for a professional grade extractor. The Super 1700 features 3 inch heavy duty casters, which give you more maneuverability when cleaning carpet in a vehicle, boat, RV, or carpet spotting at home.

>

It is the ONLY portable extractor with a 200 psi water pump! No other hot water extractor combines a compact size with such impressive cleaning power. The water pump delivers hot water to the carpet to break up spots and stains quickly, even stubborn, greasy stains!

The filter bag catches large debris before it enters the recovery tank.

The Durrmaid Super 1700 Extractor & Wet Dry Vacuum has an easy-access control panel just behind the handle, including a water level indicator light and a heater light. Once the water tank is filled, it takes about 15 minutes to heat. and it maintains that heat as you work.

A 200 micron, nylon filter bag in the recovery tank enables the Durrmaid to pick up heavy debris, like dirt, sand and even hair. The bag holds up to 5 lbs. of debris! This feature enables you to dump solid debris into the trash and pour out the liquid waste water separately. Quickly empty the filter bag with a quick turn of the lid. The contents empty through an opening in the bottom of the bag, as shown above.

The changeable tips restrict water flow to prevent over-saturation of fabric or carpet. The vacuum reducer limits the suction on delicate surfaces, like the headliner.

The Durrmaid Super 1700 Extractor & Wet Dry Vacuum includes a see-through Lexan Carpet/Upholstery Tool. This detailing tool has stainless steel glides which travel easily over carpet with no friction. Because they're stainless steel, they will not warp due to hot water temperatures. Two quick-change spray tips allow you to cut the water flow to reduce drying time. The vacuum's suction can be reduced with a thumb control, for delicate areas, like the headliner.
