SOS StainOut Systems 71-002 SOS Pro Sub Surface Extraction Tool Freight Included GTIN 865183000137

Manufacturer: StainOut Systems

StainOut Systems 71-002 SOS Pro Sub Surface Extraction Tool

Features:

The SOS PRO is the professional's tool of choice for water damage, flood restoration, and odor control. Use the SOS PRO to perform sub surface extraction and remove excess water from carpet and padding without having to remove it. Or, use the SOS PRO to evacuate black water floods and more easily remove and carry out carpet and padding.

The SOS PRO is ideal for carpet cleaning jobs such as removing pet urine and odor, feces, vomit, and any other carpet cleaning job which requires that an area be saturated before extraction. The SOS PRO works with carpet extractors and truckmounts for powerful suction.

The SOS PRO is designed for and by the pros. From its sleek design to its durable components, every- thing on this tool has been thought out and built with quality in mind

Specification

- 9.5" x 16.5" full extraction range
- Clear top to view extraction process

- Stainless steel vacuum flange works with 1.5" and 2" hose cuffs
- Vacuum release for truckmount use
- Lightweight and durable build
- Textured, non-slip foot rest
- Includes water-resistant carrying pack

Manual

How to Perform Sub Surface Extraction

What type of wet/dry vacuum can I use with the S.O.S. Tool?

The S.O.S. Extraction Tool has been designed to fit any standard wet/dry vacuum with either 1.25", 1.5", and 2" hoses. If you're a professional, the tool can also be used with any truckmount or carpet extractor. The patented design of the S.O.S. Extraction Tool allows for targeted airflow to the pad beneath the carpet surface to suck up bacteria, odors, and liquids.

STEP 1: Saturate the affected areas with a professional grade strength Urine, Odor,

>

and Stain remover. Allow the cleaning solution to seep deep into the carpet's backing, padding, and subfloor, in order to target the entire odor source. The solution will work to rehydrate, emulsify, and break down organic soil and pet urine solids in preparation for extraction and rinsing.

STEP 2: Finish by using the the SOS PRO with an extractor or truck mount to flush out the solution and contaminants from the carpet.
