Model Number: ZRPLRISER

Malish ZRPLRISER Floor Machine Riser Plastic 6.75 OD Hole Diameter 5 inches 1.25 inches thick

Manufacturer: Malish

- Malish ZRPLRISER Floor Machine Riser
 - Lowers the brush or driver below the apron or skirt to prevent rubbing against housing
 - Plastic Disc/Pad Riser
 - Use with high & low speed floor machines
 - 5" Center Hole
 - 1 1/4" High / thick
 - 6 3/4" Diameter

Please note that brushes and pad drivers need to be 2 inches smaller than the outside of the floor machine apron. Example a 17" floor machine would need a 15 inch brush in order to fit the brush all the way up and under the floor machine skirt/apron. If you want to use a 16 inch or 17 inch brush/driver you will need to install this riser between the clutch plate and brush/driver. This will lower the brush beyond the apron to prevent rubbing.
