Model Number: K01-2450

Steel Eagle K01-2450, Primary Separation Vacuum Tank Filtration System

Manufacturer: Steel Eagle

This is recommended for the Fury 2400 without the CVU

The Steel Eagle Primary Separation Tank Filtration System is a recommended accessory for the Fury 2400 Series Vacuum Recovery System series. The water is drawn by the vacuum to this primary separation tank which then filters out the larger particles present in the water.
