Model Number: K01-2500

Steel Eagle X-11 Recycle System K01-2500

Manufacturer: Steel Eagle

Steel Eagle X-11 Recycle System K01-2500

The Steel Eagle X-11 Recycle System is the latest edition to our Reclamation systems line of
products. For use with all Fury 2400 Vacuum systems.
Increased efficiency of the X-11 is due to the innovative design with a greater water capacity allowing improved settling time for suspended solids which helps prolong the life of the polishing filters. Even greater efficiency and filter life is maintained by adding our primary separation tank for use as a pre-filter for the X-11.
Oleophilic (oil attracting) coalescing plates, reusable oil filtering foam media, oil absorption skimmer
media and improved clarity with a four step reduction polishing filter manifold removing suspended
particles down to a five micron size at a rate of 11 gallons per minute.

Specifications:
Electrical Requirements 120VAC @ 2000 Watts
Flow Rate 11 GPM Maximum
Dimensions Length 60”
Depth 42”
Height 48”
Weight (Dry) 300 lbs.
Inlet 1” NPT
Outlet 3/4" NPT
