Model Number: 730002

MasterBlend Visiflow Chemical injection meter without knob 730002

Manufacturer: MasterBlend

Dwyer Instruments VisiFlow VFA-42-BV is used on many brands of industrial carpet cleaning truckmounts including Prochem, Hydramaster, Butler, White Magic, Power Clean, Ace, Mini Truckmounts, more....(styles that use last step chemical injection)

Marketed under the following part numbers

Dwyer VFA-42

HydroForce PP18-808513

Prochem 18-808513

Prochem 86181170

8.618-118.0

86181180

190-01A

8.618-117.0

and 12311A

8.710-101.0

343728

White Magic A019

The Visi-Float® flowmeter bodies are cut and precision machined from solid, clear acrylic plastic blocks. This construction not only produces a handsome finished product, but permits complete visual inspection. As a result, the Visi-Float® flowmeters are especially popular for medical and laboratory equipment applications.

Scales are easy to read - The front scale location and white background provides excellent visibility. The direct reading scales are hot stamped into the plastic and will not wear off. Mid-range calibration is established with a master flowmeter. Accuracy is  $\pm 5\%$  of full scale for VFA models,  $\pm 3\%$  for VFB. Scales average 2" long on the VFA models, 4" long on VFB. This model will show readings between 1.4 to 10 gallons per hour flow. The flow rating is only displayed while the cleaning operators is using water.

Durable and attractive construction - The machined acrylic bodies of the Visi-Float® flowmeters are practically unbreakable. Fabrication is backed by over 60 years of experience in acrylic instrument machining. The tapered bore is precision machined to a smooth surface that provides perfect visibility of the indicating float.

The VFA and VFB models are available with either brass or stainless steel inlet and outlet connections and are tapped for 1/8" NPT thread. All standard models employ Buna-N o-rings for leak proof operation and are available with either back or end connections for horizontal or vertical piping. Precision metering valves in brass or stainless steel are available for most VFA and VFB models.

Easy installation - All Visi-Float® flowmeters have metal mounting inserts on rear for panel mounting. They can also be supported directly by system piping.
