FOR HEAVY URINE SOILS

• Thoroughly saturate affected area, making sure to effectively wet the underlayment, whether wood, concrete or padding.

• Allow to dwell for 1 hour. The affected area must stay wet throughout for the urine stain to be completely oxidized. The longer the dwell time, the better the results.

• Deep extract using cold or warm tap water. After extraction, use of a carpet fan can help to accelerate drying.

FOR LIGHT URINE SOILS AND ODOR

• Dilute with one part of water (1:1 dilution) and apply as above. It can also be applied topically with a spray bottle for controlling urine odors.
