RMR Brands RMR-86 Instant Mold & Mildew Remover 32oz. Spray Bottle

## Product Overview

RMR Solutions believe in getting the job done right the first time. Spray RMR-86 on mold stains or mildew stains and watch your problem disappear before your eyes in seconds. It's that good. It's our get-the-job-done-right-the-first-time philosophy that has made RMR solutions the fastest growing manufacturer of products for cleaning and stain removal treatments.

RMR-86® was formulated over time by disaster restoration professionals with tens of thousands of hours in the field. We knew there had to be a better way than the old techniques of wire brushing and sanding, or dry ice blasting. We worked with a variety of products in this category over that time, and came to know what did and did not work. Staying true to our get-it-done-right philosophy, we began testing and tweaking our own formulas, ultimately arriving at a solution that literally removes mold stain and mildew stains in seconds and instantly restores wood and other surfaces to a like-new appearance. That solution is RMR-86®. There are simply no faster or stronger stain removers available to consumers. RMR-86® is ideal for wood, decks, railings, concrete, outdoor furniture, drywall, siding, tile and grout, fiberglass, vinyl, counters, tubs, toilets, shower doors and more.

- Simple and quick instantly removes mold stains and mildew stains
- Removes mold stains without scrubbing, sanding or wire brushing
- Works on most surfaces: wood, concrete, drywall, siding, tile and grout, fiberglass, vinyl and more
- Works great all around your home, it's amazing on boats too
- Powerful bleach-based formula renews, restores and protects 200-400 sq. ft. per gal. when sprayed according to specification
- Can be used both indoors and outdoors
- Restores surfaces prior to repainting

## FAQ

Q: What is the coverage for the RMR-86?

A: On average a 32 oz bottle covers about 60 square feet and a 1 gallon covers about

>

200-400 square feet. This can vary based on the severity of the affected area, as well as how liberally the product is applied.

Q: How do I apply the RMR-86?

A: A direct spray is required for the RMR-86 to work properly. Using a trigger sprayer on the bottle for small jobs, or a pump-up sprayer or an electric sprayer for larger jobs. Using on a rag is also acceptable in some cases. Make sure you shake product vigorously prior to applying as well.

Q: Will the mold come back after using the RMR-86?

A: Mold can certainly grow back after using any type of mold product out there. The key to keeping mold from growing back is making sure you correct the issue in which mold is able to grow. Keep in mind if there is humidity relatively above 50% or any kind of moisture on a substrate, mold can grow. Use RMR-86® to remove those ugly stains and make sure you fix the moisture problem to prevent mold from fully coming back.
