The T-REX[®] is the Ultimate in Total Rotary Extraction. Say goodbye to traditional wand carpet cleaning. With Mytee's high performance rotary extraction tools, carpet cleaning has never been easier. The rotary action of the cleaning head does all the work, meaning less user fatigue and more consistent results in a fraction of the time that it takes to use a wand. The powerful 1 HP motor on the T-REX[®] allows you to clean faster and deeper. It also works to easily lift embedded soil and restore the carpet surface. Impress customers and build loyalty with superior cleaning results. Add the Mytee[®] T-REX[®] to your cleaning arsenal today. The T-REX[®] features:

- 15" Prime; Cleaning path
- 160 RPM
- 6 vacuum slots for quick drying times
- High solution flow; 6 jets.

>

Powerful 1 HP electric motor
Ambidextrous safety switch – prevents damage to near by objects
Elevated, easy handle adjustment
Clear swivel tube
2″ Cuff-Lynx™ hose connection with retainer keeps vacuum hose from getting in the way
Pigtail with detachable 25′ lighted power cord
Front handle for easy pick up
6″ wheels

Includes:

FREE pre-installed carpet brushes, valued at \$199! (Part #A129)
Wrench for easy hub removal
Storage cover to protect head when not in use
Stainless steel cleaning head (Part #A102)
4 oz bottle of Teflon Lubricant (Part #PH648)

Benefits of Total Rotary Extraction:

Clean more surface area in less time, which means more jobs and more money. With over 960 cleaning passes per minute, the T-REX™ machine cleans faster and better.

- Deep clean heavily soiled carpets in less time
- Less user fatigue for consistent cleaning results
- Lift embedded soil
- Restore carpet surface
- Faster drying times
- Impress customers with superior cleaning results and gain repeat customers

Please note that because of the high water flow use, we recommend that you consider a truck mounted extractor or portable carpet cleaning machines that are auto fill and auto dump. Then because the machine is hooked to the sink, you need a higher performance machine with at least Dual 3 Stage vacs, Triple 2 stage vacs, quad 2 stage vacs, or dual 6.6 vacuums to run the longer hose runs. These would be a recommended 25+ amp vacuum system. Please do not try to operate 14" and 15" wide wands with machines that have 5 stages or less of vacuum.

Note: Because this wand has 6 jets on it, most machines will experience a pressure drop between pump standby pressure and use pressure. Example: Pressure gauge might be set on 450 psi but when you squeeze the trigger on the tool, the use pressure might fall under 225 psi. Suction feed machines will experience a larger

>

pressure drop than pressure feed machines. If you own a suction feed auto fill extractor, you can convert it to pressure feed if you want to improve cleaning results. All makes and brands of portables can be converted from suction feed to pressure feed. .

There were two parts missing according to the parts list. One was the H061 2' vac hose x 22 and the and the other, G082A sleeve, vac relief, 2", spin.

Both these parts are not missing rather been removed from the box as they are no longer included. So far the last two customers that have purchased this wand have both called SteamBrite and we have already confirmed this is not a packaging error. Your 2" truckmount or portable vacuum hose it to hook direct to the wand. No leader hose with vacuum relief is included or needed.

The E363 potentiometer, slide (speed control knob) has been removed from the design.
