DriStorm Dehumidifier Booster Amplifier 20181009 Raises Temp and Lowers Relative Humidity

Manufacturer: Clean Storm

DriStorm Dehumidifier Booster 20181009 Raises Temp and Lowers Relative Humidity

Designed to be feed with the outbound air from your low grained dehumidifier.
Add 1500 watts of heat and lower the relative humidity to the air that comes out of your dehumidifiers.
LG or Low grained dehumidifiers typically have air that comes out of the dehumidifier at 16% RH at 90-95 degrees F.
If you take that same air and raise the temperature to 118 degrees F, the relative humidity will drop below 9%.
Simple, lightweight design, and effective design.
Makes the air 100% more moisture absorbent (see chart below.)
This will give you the same drying as desiccant dehumidifiers without the investment.
Can be used to raise the temperature on job sites in the winter time that do not have a working heater.
Safely leave your 1500 watt heater unattended in this UL Listed safety box.
Finger guard protection keep little hands out of heater.
Made with all UL, CSA, or ETL listed parts.
Perfect accessory for jobs that have hard to dry locations: hardwood, cabinets, walls.
Assist in taking your hottest, driest air to move over the wetest surfaces.
Housing made from:
UL listed and meets NEMA enclosure types: 1, 3, 3S, 4, 4X, 5, 6 and 6P Enclosure ratings (before we cut holes in it.) Read out NEMA enclosure types HERE.
Faster ROI than desiccant dehumidifiers and amplifiers but does the same type of work.
Works with all brands of refrigerant ductable restoration dehumidifiers.

Ductable on both sides.
Heavy duty rubber feet.
Extra large handle doubles as a cord wrap
25 ft of 12-3 with male glow plug
Switch protection cover.
15.6 lbs net weight with cord.

Build in Quad protection:
GFCI daisy chainable (with low amp draw equipment).
15 amp breaker
Dual 200 degree shut off (If one does work the other one will).
12 amps

NOTE this is to use with other wall, cavity, hardwood floor drying equipment. The video is only showing the proof of concept and is not to use open air in your building unless the build is than 60 degrees F and you just need the heater to raise the

Steambrite Supply

ambient temperature. You are to take the warmest driest air from your dehumidifier and heater and move it over the hardest to dry surfaces. Example feed dehumidifier air into the heater, then this air into the WRT-Wall Unit, or feed into a Drieaz F211, or feed into wet walls, under stair cases, in cabinets, document drying chamber, and to tent over the top of a wood floor...
