Solderless Blue Male EZ Spade Connector Half Nylon Insulated 14-16 Awg 621214

Manufacturer: Steambrite MFG

Solderless Blue Male EZ Spade Connector Half Nylon Insulated 14-16 Awg 621214
Clear Nylon, Partially-Insulated Push-On Terminals - 16-14 Gauge

Partially-insulated push-on terminals are female and male blade type connectors that mate with each other to connect or disconnect a wired connection. The nylon insulation partially seals the terminal. Partially-insulated push-on terminals can be used in automotive, marine and other applications.

Nylon insulation material is molded onto brazed seam barrel and is resistant to deformation.
Funnel entry is formed into inside of insulation to allow for easier wire insulation.
Brazed seam will not separated under pressure or operating stress.
Clear nylon allows for easy inspection of wire connection.
Industry standard color-coding indicates wire range
Rated to 600 volts maximum, building wire; 1000 volts maximum, 105° C.
