Phoenix AirMax Low Profile Air Mover- Blue- 4035060

Manufacturer: Phoenix

This product comes in Red or Blue. This listing for Blue model. For Red, see 4035000.

PHOENIX AIRMAX RADIAL AIR MOVER

New Leader in Performance, Convenience, Portability, and Safety for Low Profile Air Movers

Its compact 20" X 17" footprint and 8" height make the Phoenix AirMAX Radial Air Mover the most compact and portable fan in its class. The rugged mold in the handle gives you the solid control required when packing and unpacking lots of air movers. Its easy-winding cord wrap and multiple securement options makes it a snap to prep for transport. Because of its deeply-molded interlocking features, the Phoenix AirMAX is rock solid when stacked for transport.

With its Patent Pending, motor support x-bracket and optimized outlet shape, the Phoenix AirMAX delivers airflow of 925 CFM. This gives you high velocity air over a 25% larger area than other low profile air movers. In addition, the Phoenix AirMAX is stable in all 4 drying positions to maximize flexibility.

The Phoenix AirMAX is the safest fan in its class providing a quality GFCI convenience receptacle that protects not only connected loads, but onboard components as well. This is unlike competing fans that require external GFCI protection. In addition, where competitors position high voltage electrical connections low to the floor, the leading edge design of the Phoenix AirMAX allows these connections to be located more than 4 times the minimum required height. The Phoenix AirMAX is built to keep the contractor and their customers safe.

Features:

- 925 CFM
- 1.9 Amps
- Onboard circuit breaker and branch protection GFCI
- Daisy chain up to 6 fans on a single 15 Amp circuit
- Ultra secure stacking and cord wrap
- Heavy wall polypropylene housing
- Cord 16ft Power Cord
- ETL Tested to UL and CSA Standards
