HydraMaster 000-163-212 Rotomold Belly 70 Gallon Fresh Water Tank Low Profile with transfer pump

Description
If you need a place to store your wine glasses, this is not the right tank for you. It doesn’t attempt to hold chemicals, or sprayers, or soda pop cans. It does what a fresh water tank is supposed to do: increase available floor space in the van; reduce set-up and tear down time at the job site; and deliver fresh water to your truckmount consistently and effectively.
Can be configured for a Boxxer 318, Boxxer 318HP and Boxxer 423s.
Installation of this product into Unibody construction van such as a Ford Transit, Dodge ProMaster, Nissan CV, or Mercedes Sprinter models may require a sub frame to avoid drilling in the no-drill zone for these vans. Consult with your vehicle dealer and installing distributor. The part number for the sub frame Ford Transit sub mount frame is part# 105-726, quantity of two is needed.
Shown here with optional Boxxer 318
