Model Number: T18000

Husqvarna Pullman Ermator T18000 480Volt 3-Phase 967751501 24.1Hp 2007005086 Hepa Dust Slurry Extractor Price Match

Manufacturer: Husqvarna Construction Products

Husqvarna Pullman Ermator T18000 480 Volt 3-Phase 967751501 24.1Hp T 18000 2007005086 Hepa Dust Slurry Extractor

T 18000 is an effective industrial dust collector to match the highly productive Dual Drive Technology[®]; grinding machines Husqvarna PG 820 RC, PG 820, PG 680 RC, PG 680 as well as shavers, shot blasters and saws. Ideal for heavy-duty work and exacting demands on dust extraction. Powerful motor with ample capacity. The machine can deal with materials that are difficult to handle, such as grinding dust and demolition materials in a wide variety of applications. Has a reliable filter system with high collecting efficiency and a long filter life, and can deal with large quantities of fine dust. Equipped with four individually tested and certified HEPA class H13 filters required for quartz and asbestos dust. Jet Pulse efficiently cleans pre-filter without exposing operator to dust. The Longopac[®] bag hose system ensures simple, dust-free bag changes.

The Ermator T18000 Dust Extractor provides rugged power, high capacity and raw performance, for the largest grinding operations and major construction/restoration job sites. These three-phase HEPA dust collectors are well known for their ability to pick-up vast amounts of dust and debris without interruption. They are capable of large volume recovery of concrete dust during floor surface preparation and for safe collection, disposal and handling of other harmful building materials including asbestos and lead. Three versatile models to choose from. Each unit can also perform as a central dust control vacuums for use in factories, processing plants and mills. Equipped with Jet Pulse filter cleaning system for maximizing airflow and productivity. Dual HEPA filters and Longopac[®] dustless containment & disposal system will ensure that the workplace is safe for your workers and other building occupants.

Clean air exhaust is guaranteed through four individually tested and certified HEPA filters. The intake port connects to a Y-connector where one or two 3" hoses can be

>

connected. When used with one hose, up to 100-feet in length can be used. The out-port allows venting of the exhaust air away from the work area or outside of the building via a hose connection. Jet Pulse efficiently cleans pre-filter without exposing operator to dust. The unique 70-foot Longopac® allows fast, drop-down, dust-free disposal into approximately 25 individually sealed bags. Comes with a 3-inch, 33-foot hose, and a single 4-inch to double 3-inch Y connector.

When used with two 3-head grinders (up to 32" wide), and to achieve best results, a pre-separator should be connected between each grinder and the T18000
