Manufacturer: Husqvarna Equipment

Husqvarna 967855302 LG 300 AC Soil And Asphalt Compaction Machine Compactors Honda
Description
LG 300 is a compact, lightweight yet powerful reversible plate compactor developed for smaller jobs, such as driveways and pathways, private house projects and narrow trenches. The ideal machine to use when macadam beds are thinner and you need nimble, responsive handling. The Honda GX270 petrol engine reduces fuel consumption and emissions, while quality components reduce vibrations. It is equipped with a durable Hardox 400-steel bottom plate.
Features
Plates made to last
The plates are made from the extremely durable and wear-resistant Hardox 400 steel. The special design keeps rocks from getting stuck between the plate and frame.
Strong protection, easy transportation
The heavy-duty steel frame protects the engine and transmission. The frame is also equipped with a lifting eye for easy transportation.

Low handle vibration levels
Great engineering and quality components minimise handle vibration levels and strain, therefore contributing to a safer, more productive and enjoyable workday.
Easy operation
The forward/reverse lever and fixed handle grip make handling easy on all surfaces. You don’t have to push/pull constantly during operation.
