Additional Information
All units brand new in factory sealed boxes.
Note the color/shade of the plastic housing or hose is not guaranteed.
Note tank might have water droplets in it from factory testing.
The factory also might have scratched the outside of the hose from laying in the box without a plastic bag. We have had customer ask us how we are selling used equipment as new equipment and this is not the case. We purchase 60+ units at a time on a pallet factory direct. All units are brand new in factory sealed boxes. This is how they make and fill orders. Water droplets in the tank, no clear plastic bag, maybe even small scratches or dirt on the outside of the fogger. All sales are final as these are being sold $5 over our cost. We have sold hundreds of these foggers and they work great but out of these orders we have now received two phone calls from customer wanting to exchange there units with new units. At a $5 profit we are not going to field these calls or issues.

Features:

- Nozzle mounted on long 36" hose
- Adjustable flow rate from 0 to 5.2 oz per minute
- Variable flow from ULV to light mist
- Corrosion proof 1.7-gallon supply tank

Steambrite Supply

2-stage motor
1 Year Factory Warranty

Flow Rate Data:

One-quarter turn: 1.30 oz. per minute
One-half turn: 2.6 oz. per minute
Three-quarter turn: 3.9 oz. per minute
Full turn: 5.2 oz. per minute

All sales are final, no returns accepted. All units come with a full factory parts warranty.
