ProsChoice CTI 6415C Envirex SCR - Soil Crystallization Rinse (1 Gallon / Single)

Manufacturer: ProsChoice

ProsChoice CTI 6430C EnvireX Defender Carpet Protector Case (1 Gallon / Single)

Description:

Pro's Choice STAY CLEAN products are the cutting edge of soil crystallization technology for professional cleaners.

SCR "Soil Crystallization Rinse" incorporates rinsing and enrittling agents to:

1. Rinse away soil.
2. Encapsulate residues into a brittle non-sticky crystal that is removed during vacuuming.

This leaves nearly virgin, soil free fiber that resists re-soiling very much as it did when new.

Directions:

Usage: Use a dilute solution of Soil Crystallization Rinse as your final hot water carpet extraction solution.

Dilution: For truck mounts dilute 1 quart SCR into 5 gallons water for concentrate. Set your chemical feed flow rate according to soil load (4 to 6 GPH).

For portable extractors dilute 1 ounce of SCR per gallon of water.

Caution: As with all carpet cleaning products, test for suitability and color fastness prior to use.

pH: 8

Dilution: Up to 1 oz. per gallon water

Availability: This product was added to our catalog on Monday 07 December, 2020
