Model Number: 20210526

Imperial 20210526, 1942 Series 4 hole to 3 hole conversion bracket, Tangential 4 Hole Mounting Vacuum Motor, 5.7in

Manufacturer: Imperial Electric

Tangential Discharge Vacuum Motor - Sourced Replacement for 1942, BPT, B/B, AS, PB, 2 STG

2 STAGE VACUUM MOTOR 115V with 4 hole bolt pattern mounting has been discontinued. Use this bracket to use standard 2 stage vacuum motors that have a 3 hole pattern to bolt in

Vacuum motor is not included, rather just the single bracket. Other parts might need to be sourced to make this work.

You might also need two 1/4-20 X 1" bolts, two 1/4-20 nylon lock nuts, two 1/4" flat washers. Bracket jumps between the two holes you do not need and makes a 4th mounting hole you can use to mount a standard 5.7" 3 hole vacuum motor to use in a 4 hole pattern system with 180 degree offset mounting holes.

PLEASE READ OUR RETURN POLICY IF YOU THINK YOU CANNOT MAKE THIS WORK. NO PHONE OR TECH SUPPORT PROVIDED ON THIS PART.

Note: VBDST12431AEAD is the actual vacuum motor used in SPX Dock Products (Kelley) aFX Dockleveler, aFX-S Dockleveler & aFX-C Dockleveler (P/N 714-244K). See pictures below. Click on any for large version. Previous Kelley part number (P/N 711-969) subs to 714-244K now you can use the LH6472-AL-DL Viking PVE7108

Factory charges a heavy shipping charge and sales tax in most states.
