Chevy Silverado EV Level 2 Travel Box Power Supply 20220920 Electric Car Charger Dual 20amp 120volt To 240volt 14-50R

Manufacturer: Clean Storm

Chevy Silverado EV Power Supply Travel Box 20220920
Power Cord Adapter Inverter (Reverse Converter) Takes two 120 volt outlets and allows you to use 240 volt appliances that uses under 20 amp @ 240 volts (under 4800 watts) Single phase current to NEMA 14-50R receptacle. Commonly used as Level 2 Chevy Silverado EV and Tesla electric car charger. Fast and easy 240 volts.

Works with: Chevy Bolt EUV, Bolt EV, Equinox EV, Blazer EV, Silverado EV and hundreds more.

Other 220 to 240 volt receptacles available including but not limited to: NEMA 6-30R, NEMA 6-50R, NEMA 10-30R, 14-30R, 14-50R, more

Perfect for electric cars, pressure washers, welders, plasma cutters, vapor steam cleaners, and other high powered equipment when 240 volt plugs are just not available.

Not for use on GFCI or LDCI 115/120 volt Outlets.

To use simply plug into different outlets and push the momentary button to test voltage. If the voltage is between 220 to 240 volts you will get a bright green light confirming you are all good to go. If the voltage is not correct the green light will not illuminate. Not all outlet combinations will produce the correct voltage so you have to test before each use. If you push the voltage test button and get no bright green light, simply re-located just one of the power cords to a different location and retest. Every job site location has the ability to provide plus or minus 230/240 volts. If you use 15 amp 115/120 volt circuits then you will only be able to operate 15 amp 230/240 volt equipment. If you land and dual 20 amp breakers, you can operate up to 20 amps at 240 volts.

Until both 120 volt power cords are connected to a 120 volt electrical source, it is electrically isolated from the electrical circuit of the open male plug on the 2nd power cord. This protects the user from accidental shock through the exposed male plug contact.

The Telsa Electric Cars use 14-50R outlets.
For the Ford Focus you can purchase the 14-50P Plug and install on the end of your cord kit. Other Ford Focus uses have purchased the 10-30R unit so they can use the optional extension cord.

Made in the USA.

Testimonial:

"I primarily purchased the converter box solely for charging my Tesla vehicle when I find myself visiting friends or family whom do not have a 220v outlet I can use. The converter purchased from your website has been extremely convenient, I simply keep it in my trunk, so I always have it when I need it. The cords are extremely long, and the charge time is significantly shorter than a regular 110v outlet; I would definitely recommend this product to others.
Thanks."

Note: for some Tesla owners you have to manual lower the amp draw charge on the onboard computer to 240 volts 16 amps from the default 32 amps. This will allow you to charge the car 100% faster than 120 volts @ 16 amps.

Manufacture 1 year warranty. Add optional 2 or 4 more years for a little more.

.

What comes with most electric cars is a factory provided 120 volts 16 amps or 1920 watt charging cord.

A level 2 charging speed is 240 volts 16 amps or 3840 watt charging cord. This is 100% faster than the default factory included cord.

Fast speed and adjustable chargers are 240 volts up to 32 amps or 7680 watts. This is 100% faster than the 3840 watt charging cord and 400% faster than the factory provided cord.

Set to 16 amps @ 240 volts when using adjustable speed charges. The more time you have to charge your car, it's best set to the lowest setting.

1. Take with you on the go. See below. Set to 16 amp and use this optional converter box.

Testimonial:

"I use this to to power my portable EVSE. (With a 32 amp adjustable EV Car charging cable)
I recently got a (electric Genesis) GV60 and picked up the power joiner to hold me over until the electrician could install a 14-50r. Now I keep it in the car in case I need to charge while at my girlfriends or visiting friends or family. Product works great once you find a matching pair of sockets. I've used it on 15 and 20 amp circuits and have had no issues."
