The PG 540 (5.5 hp / 4.0 kW) is a powerful, compact and versatile planetary floor grinder perfect for smaller jobs. Available in both single phase and three phase. It combines a smart compact design for easy transportation with real work-horse performance and sheer grinding power. Thanks to the split-chassis design, the PG 540 fits in most standard cars. It's easy to handle, tilt and operate with optional adjustable integrated weights for extra grinding pressure. Suitable for all applications: floor prep, grinding and polishing. The PG 540 is the compact choice for the HIPERFLOOR™ concrete polishing system. To maximize reliability and reduce maintenance, the vital components of the PG 540 are protected against dust and slurry inside the hermetically sealed grinding head and electrical cabinet.

40 inches

.
When using the dual 120 volt power supply kit that is included on this webpage, please note the use of the added optional weights might take some floor amp draw on the machine to over 20 amps and trip the breaker. Best to use one of the other two volt options when using weights.
